AMENDMENTS TO THE SPECIFICATION

Page 3, line 34 to page 4, line 3 is amended as follows:

The *Roboform user manual*, ~~published at http://www.roboform.com/manual.html,~~ ©1999-2002, updated January 25, 2002, describes a client-based web form filler that works as an add-on to conventional web browser applications. Forms may be filled in either by means of a "pass card," a record that saves information related to a specific form at a particular web site, or by means of an "identity," a user profile, wherein the software application analyzes the page encoding and populates the form fields with appropriate data from the identity. By the user selecting a country, the application applies the appropriate display format to form data such as dates and telephone numbers.
